

Wizarding Bloodtypes

These base Type is the same as in the Muggle World:

O
A
B
AB

Additional / Magic Type (based on the wizards / witches powerlevel):

[Credit to [Viscountess Babbles-On](#) for the Blood-Magic-Type - it's her's and I took it from her story: [The blood connection](#)]

I my have altered some things a bit but please don't flame me,
I'm just borrowing this for my own story (It **won't** have major importance there).

Sigma	σ	The strongest type (only powerful magical beings have this)
Theta	υ	The second strongest type (powerful people have this)
Delta	δ	The middle type (the most common)
Gamma	γ	The second weakest type (the weaker magicals have this)
Alpha	α	The weakest type (Squibs have this)

How common are the Types?
